**Many solutions in one single machine Versatile, safe and easy to use for any emergency situation.**

The multifunctional trailer unit, Lampo Emergency, stems from our desire to package 4 fundamental instruments ready for fast action in a single machine: power generator, light tower, self-priming pump and air compressor - all mounted on a trailer and soundproofed.

Rugged and ready to be mobilised wherever the emergency or natural disaster strikes!

Lampo Emergency is synonymous with flexibility and is an ideal partner in all critical situations.

It is available in seven standard sizes from 11 to 100 kVA, with Gorman-Rupp self-priming electric pumps from 10 to 150 l/s and light tower with LED lamps.

Lampo Emergency can be highly customised to meet all your needs.
